

■ FMX™ System

Specially designed foaming formulas, enriched with vitamins and moisturizers, provide an amazingly gentle cleansing experience along with a fresh, clean scent. Push dispensers, with viewing window for easy maintenance, offer a generous portion of soft, gentle foam. Air is infused into the soap as it is dispensed, resulting in a rich, creamy lather.

How to choose a liquid soap dispenser

1. Soap system or nonsystem dispenser?

Soap systems provide bag-in-box refill convenience, and are designed for use with specific soap and lotion types and sizes. Capacities range from 500 ml to 5,000 ml. Nonsystem dispensers can be used with virtually any soap or lotion, and hold 30 to 40 ounces.

2. Metal or plastic construction?

Plastic dispensers are less expensive upfront. They offer complete visibility, facilitating timely refilling. Metal dispensers are stronger; they last longer and provide protection against tampering and vandalism. Metal units lock to prevent theft.

3. Wall- or counter-mount style?

Wall-mount dispensers require adequate wall space in the right locations. Counter-mounted dispensers are a good option where a mirror hangs across the sink area. A counter-mounted dispenser is generally provided for each sink, while each wall-mounted dispenser can service more than one sink.
