EchoMop: The Environmentally Responsible Mop Head

PET (polyethylene terephthalate) is a polyester plastic commonly used for bottling water, soft drinks, cosmetics and other liquid products. Although popular for packaging, PET contributes to landfill waste and the use of natural resources. For example, in 2002, 2 billion lbs. of PET bottles were wasted, and these bottles will not break down for at least 2,000 years. There are currently four tons of PET wasted for every ton recycled—yet just eight 16-oz. PET bottles can make 1 sq. ft. of polyester carpet, one x-large t-shirt, two baseball caps or one large mop head. Additionally, recycled PET can be used in athletic shoes, luggage, automotive parts, industrial strapping and more. Purchasing products made from recycled PET can help diminish landfill waste and conserve natural resources.

A. EchoMop Looped End Wet Head

The first mop head made from recycled PET plastic bottles, contributing to reduced landfill waste, energy consumption and impact on greenhouse gases. EarthSpun® fibers are treated with AgION Silver-Copper Ion agent. AgION will not wash out into the environment and is no more toxic than common table salt. Longer-lasting, lower-linting mop head offers 20% better performance than competitive all-synthetic wet mop yarns. Absorbs more than 4.4 times its weight in water and releases almost 30% upon wringing. Washable and fast drying. Dries quickly—90% dry after only the spin cycle of the washer; air dries 100% overnight. Wide 5" mesh headband works with clamp, quick-change or jaws mate handles (sold separately). Green. Contains 35% post-consumer recycled material. ♻️
