

Antimicrobial Mop Heads

Web Foot® Compact Mop expands to full size when put into service.

**WEB FOOT® MOP HEADS**

- Antimicrobials inhibit bacterial growth and help mop heads last longer
- 100% cotton content from post industrial use
- 100% blue and green polyester yarn are post-consumer PET

**A. Web Foot® Shrinkless® Wet Mop**

Laundryable mop head is ideal for healthcare applications. Four-ply balanced blend of cotton and synthetic yarn withstands repeated launderings without shrinkage. Looped ends and tailbanding reduce tangling. Made with recycled fibers. White yarn, prelaundered and preshrunk. 6 mop heads per case.

*How to choose wet mops*

- 1. What type of head should I choose?**  
Choose natural cotton for general mopping. Rayon is ideal for finishing. Looped end/tailband mops reduce linting, fraying and unraveling. The tailband also prevents tangles and provides more coverage with each stroke.
- 2. Are mops available for special uses?**  
Yes. We offer mops with a built-in scrub pad, anti-skid mops, rough floor mops, cleanroom mops, antimicrobial mops and special finishing mops. Some styles are available in different colors; color-code by mopping use.
- 3. What mop handle do I need?**  
That depends on the mop head style, the headband size and special features desired. A standard head uses a clamp style handle; a saddleback head uses a clamp or gripper style handle; a lieflat head requires a lieflat screw-in handle. Some handles hold only mop heads with a certain size headband. There are antimicrobial handles and quick-change handles, and handles with various connecting mechanisms.
