The EPA can help you find places to recycle (recycle electronic equipment). Remember—the computers, monitors and cell phones that may be out of date for your state-of-the-art office building can give others opportunities they might not otherwise have. Take the time to look up these resources online at [www.epa.gov](http://www.epa.gov). In fact, the EPA’s website is a great source of green information if you have questions about how to properly dispose of many dangerous materials. You will also find many helpful free programs, publications, pdfs and podcasts.
